THE COMEBACK

Plan for Aamna

WEEK 1 · SESSION 3 · TUE 10 NOV 2026

SOLO STRONG

Solo · Aamna | ~50 min | Phase 1 · Re-Entry | Effort: RPE 6, about 4 reps left in the tank

Your first solo session, Aamna. Everything here is easy to set up on your own: dumbbells, one cable machine, a bench and the rower. You trained Saturday and Sunday, so today makes three sessions and completes your Week 1 target.

01 Show up solo

02 Goblet squat: Saturday's weight or one step up

03 Learn the step-up

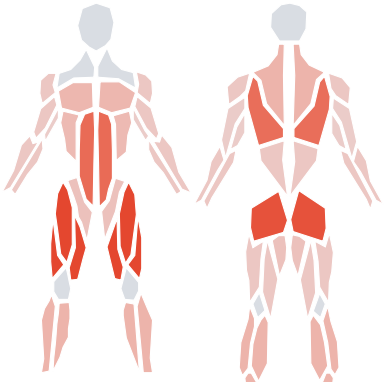

04 Finish strong on the rower

> Feeling very sore or run down? Use Plan B at the bottom. Sharp or joint pain means stop that exercise and use its swap.

TODAY AT A GLANCE

8 min	12 min	12 min	8 min	6 min	5 min
Warm-up	Block A	Block B	Block C	Row Strong	Cool-down

WHAT TODAY WORKS

- Quads
- Glutes
- Abs
- Upper back & lats
- Calves
- Traps

HOW HEAVY?

After every set ask: how many more good reps could I have done?

5+	Too light. Go up one step.
3–4	Perfect. Stay. This is today's effort.
0–2	Too heavy. Drop a step.

Sat ✓ | Sun ✓ | Tue: today | = Week 1 target

WARM-UP · 8 MIN

First: 5 min incline walk or easy bike, slow enough to hold a conversation. **Then:** one round of:

World's Greatest Stretch 3 / side
Step into a long lunge, both hands down inside your front foot

Glute Bridge × 12, 2 s squeeze
Feet flat and hip-width, heels close to your butt

Band Pull-Apart × 15 (no band: arm circles)
Arms straight, band at shoulder height

Bodyweight Squat (paused) × 8, 3 s down, pause at the bottom
3 seconds down

Inchworm × 4
Fold forward with your hands on the floor (bend your knees if you need to)

A BLOCK A · SUPERSET

3 rounds · ~12 min · rest 60 s

Do A1, then go straight to A2, then rest about 60 s. That's 1 round. Grab your dumbbell and take it near the cable row so you don't lose your spot.

A1 GOBLET SQUAT

3 × 10 RPE 6

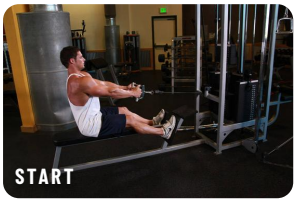

Quads · Glutes · Inner thighs · Abs

Your start: Start with Saturday's weight. If 10 reps felt easy then, go one dumbbell up.

1. Hold the bell by the horns, tight to your chest
2. Feet shoulder-width, toes turned out slightly
3. Sit down between your heels, elbows inside your knees
4. Keep your chest proud the whole way

Avoid: Heels lifting: shift your weight to mid-foot, or put small plates under your heels.

Aamna SETS 1 2 3 KG _____ FELT Easy · Right · Heavy

A2 SEATED CABLE ROW

3 × 12 RPE 6

Upper back & lats · Rear shoulders · Biceps

Your start: Pick a weight you could pull about 15 times. Chest tall, no rocking.

1. Chest tall, slight bend in your knees
2. Pull to your belly button
3. Squeeze your shoulder blades for 1 second
4. Let your arms stretch forward slowly

Avoid: Rocking back and forth.

Aamna SETS 1 2 3 KG _____ FELT Easy · Right · Heavy

BLOCK B · SUPERSET

3 rounds · ~12 min · rest 60 s

B1 then B2, then rest about 60 s. Use the same bench for both: step up onto it, then put your hands on it for push-ups.

B1 DUMBBELL STEP-UP

3 × 8 / side RPE 6

Quads · Glutes · Hamstrings · Calves

Your start: Round 1 with bodyweight on a knee-height box or bench. Hold light dumbbells only if it feels easy.

1. Whole foot on the box
2. Lean slightly forward and drive through your heel
3. Don't push off with your back foot
4. Lower slowly, over 2 seconds

Avoid: Bouncing off the back foot.

Aamna SETS 1 2 3 KG _____ FELT Easy · Right · Heavy

B2 PUSH-UP

3 × 8–10 RPE 6

Chest · Triceps · Front shoulders

Your start: Choose the height where 8–10 reps leave 3–4 in the tank.

Options: Hands on a bench · Hands on a Smith bar (higher = easier) · Knees on the floor · Full push-up

1. Hands under your shoulders, body in one straight line
2. Squeeze your glutes and brace
3. Lower until your chest is a fist's height from the floor, elbows about 45°
4. Push the floor away

Avoid: Hips sagging.

Aamna SETS 1 2 3 OPTION _____ FELT

Easy · Right · Heavy

C BLOCK C · CORE & CARRY

2 rounds · ~8 min · rest 45 s

C1, then C2, then rest about 45 s.

C1 PALLOF PRESS

2 × 10 / side RPE 6

Obliques · Abs · Glutes · Front shoulders

Your start: Light enough to hold the handle perfectly still for 2 s.

1. Side-on to the cable, feet hip-width
2. Handle at your chest, then press straight out
3. Hold 2 seconds without letting it rotate you
4. Bring it back with control

Avoid: Letting your body twist toward the cable.

Aamna SETS 1 2 KG _____ FELT Easy · Right · Heavy

C2 FARMER CARRY

2 × 30–40 m RPE moderate

Forearms & grip · Traps · Abs · Obliques · Glutes

Your start: Saturday's carry weight, or one step up.

1. Lift the weights up with a flat back, like a deadlift
2. Stand tall, shoulders down and back, ribs down
3. Short, quick steps, eyes straight ahead
4. Set the weights down with control by hinging. Don't drop them

Avoid: Shoulders creeping up to your ears.

Aamna SETS 1 2 KG _____ FELT Easy · Right · Heavy

F FINISHER · ROW STRONG

~6 min · RPE 7

6 rounds of 30 s strong rowing and 30 s easy paddling. The app beeps at every switch.

30 s Row strong · 30 s Easy · × 6 rounds

Pace: Strong, not all-out. Legs first, then body, then arms. No rower free? Same timing on the bike.

ROUNDS DONE 1 2 3 4 5 6

1. On the drive: legs, then body, then arms
2. On the way back: arms, then body, then legs
3. Push the floor away with your legs. Don't just pull with your arms

COOL-DOWN · 5 MIN

Half-Kneeling Hip-Flexor Stretch 45 s / side
Back knee on a pad, front foot forward

Child's Pose 45 s, reach to each side
Knees wide, big toes together

Doorway Chest Stretch 30 s / side
Forearm on the frame, elbow at shoulder height

Finish with 5 slow breaths (4 s in, 6 s out). That's 3 sessions: your Week 1 target is done.

EQUIPMENT TAKEN? SWAP IT

Goblet squat	Leg press 3 × 12
Seated cable row	Chest-supported row machine, or 1-arm DB row
Step-up	Reverse lunge, holding a rack for balance
Push-up	Machine chest press 3 × 10
Pallof press	Dead bug 2 × 6 / side
Farmer carry	Hold the dumbbells for 30 s, standing tall
Rower	Bike, same timing

PLAN B

Tired, sore or short on time (30 min): 5-min warm-up, Block A × 2, Block B × 2, then 3 rounds of Row Strong.

AFTERWARDS

- Send three things to the coach (or Ali): your goblet squat weight, your push-up height, and how hard it felt from 1 to 10.
- A walk tomorrow helps recovery.
- Protein at every meal and a good night's sleep.

Next: together again on Thu or Fri (T-C, Athletic & Engine, with partner med-ball throws and a partner workout).

Soreness is normal; pain is not. Stop any exercise that gives sharp or joint pain and use its swap. Exercise photos: Free Exercise DB (public domain). Muscle map: react-body-highlighter (MIT).
